28 MAR 1966

NASA review completed.

Dr. Robert C. Seamans, Jr.
Deputy Administrator
National Aeronautics and
Space Administration
Washington, D.C. 20546

Dear Bob:

Attached is a signed copy of the proposed changes and additions to the NASA/CIA Advisory Panel on Advanced Research and Technology forwarded with your letter of 16 March. I consider the expanded membership of the Panel to be quite appropriate and believe the added members will make significant contributions. The representative in the field of bio-technology will certainly be welcomed as a member of the Panel, although no formal CIA briefing on this subject is planned for the first Panel meeting.

We appreciate your willingness to have Dr. Adams attend the meetings of the Advanced Research and Technology Panel as other commitments may allow. We will invite him to future meetings with that understanding.

Please be assured that we have no intention of involving the NASA membership of the Advisory Panel in intelligence matters on a formal basis, and that day-to-day needs for information or assistance will be referred to Floyd Sweet.

Let me thank you again for your interest and cooperation in this matter.

Sincerely,

Albert D. Wheelon
Deputy Director
